

SALLY GUTIERREZ

Sally C. Gutierrez is a Senior Advisor for Water in EPA's Office of Research and Development, Center for Environmental Solutions and Emergency Response in Cincinnati, Ohio. She is assisting in the development of wastewater-based surveillance in communities, PFAS treatment research and advancing diversity, equity, and inclusion.

From 2018 to mid-2000, she served as the Acting Director of the Water Permits Division in the Office of Wastewater Management, Office of Water in Washington, DC. Prior to that, she was the Director of EPA's Environmental Technology Innovation Cluster Development and Support Program. She has also held the positions of Director of the National Risk Management Research Laboratory (NRMRL) and Director of the Water Supply and Water Resources Division in NRMRL.

Before coming to EPA, she was responsible for administering water programs for the State of Texas. She is a hydrologist and has completed over 22 years of service at EPA. She serves on the Science Advisory Board for the Nanosystems Engineering Research Center for Nanotechnology Enabled Water Treatment at Rice University and is a member of the Science Advisory Committee for the Brazilian Tropical Water Research Alliance.
